DIVE SHEETS

Must be submitted using the Dive Sheet Generator

(download HERE: http://www.integratedsports.net/iss_mms_diving_download.asp)

Deadlines to submit your dive sheets: May 17th, 2021

For all dive sheets received through the Dive Sheet Generator, you will receive e-mail notification confirming receipt. Should you not receive this confirmation, therefore you are unable to send your dive sheets through the Dive Sheet Generator, save the file containing your dive sheets, and submit by email to smayer@diving.ca.

Dive Changes

Any dive change to a list needs to be approved by the referee assigned to be on-site at your recording **1h prior to the scheduled start of the event**. The referee will note the approved dive change on

her/his report. Dive changes that are not written on the referee report will NOT be approved. After being confirmed with your referee, dive changes must also be sent by email to smayer@diving.ca.

Scratches

If a diver needs to scratch from the competition/event, you need to let Sarah Mayer know as soon as possible.

If you require any assistance with registration, submission of dive sheets and payments, please do not hesitate to contact Sarah Mayer (smayer@diving.ca).

START LISTS

Once all entries have been received, Diving Plongeon Canada will publish start lists for all events. Start lists will be available on diving.ca 24 hours prior to broadcast dates.

VIDEO GUIDELINES

- Each club that has divers competing in the virtual qualification events 1 and 2 and/or Junior National Championships will provide a set of videos at the appropriate time with the appropriate list for the event in which their divers are participating
- If a club does not have divers in an event, they do not need to provide a video for that event.
- Each club will provide their own camera operator to video their divers. They will use their own equipment (i.e. video camera or I-Pad, tripods, etc). The location of the camera will depend on the event being filmed.

SUGGESTED WAY TO PLAN YOUR VIDEO

1. Use your regular practice time to video your divers unless your pool will allow you to book special time to do this
2. Contact Sara Toth (sara@diving.ca) to let her know when you will be doing the video – she will assign an on-deck referee who needs to be there to verify that all the video was done in a continuous manner and to assist with any difficulties – they will also announce the dives and blow the whistle so that the divers feel more like a competition
 - a. When you make your request, you need to provide detailed information such as the date and time of your recording.
3. Video all your 1 meter divers in one continuous video
 - a. Document the following accurately so that Tim can place the video clips in the correct event in the correct order and labeled with the correct divers name
 - i. Names of divers in the order they are videoed
 - ii. Age category of the diver – D1, D2, C1, C2, B, A
 - iii. Number of dives the diver will do
 - b. All divers must perform all their dives in the same order
4. Video all your 3 meter divers in one continuous video

- a. Document the following accurately so that Tim can place the video clips in the correct event in the correct order and labeled with the correct divers name
 - i. Names of divers in the order they are videoed
 - ii. Age category of the diver – D1, D2, C1, C2, B, A
 - iii. Number of dives the diver will do
- b. All divers must perform all their dives in the same order
5. Video all your platform divers in one continuous video
 - a. Document the following accurately so that Tim can place the video clips in the correct event in the correct order and labeled with the correct divers name
 - i. Names of divers in the order they are videoed
 - ii. Age category of the diver – D1, D2, C1, C2, B, A
 - iii. Number of dives the diver will do
 - b. All divers must perform all their dives in the same order
6. You can start with your youngest age category or your oldest age category and it would be easiest to follow if you keep your age category and gender together in the list
 - a. If you have too many divers to record in one session, make sure that your age groups are together.

Example: 1 meter competition

Divers name	Divers gender	Divers age category	Number of dives
Olivier Morneau-Ricard	Male	D1	5
Bev Boys	Female	D2	7
Mitch Geller	Male	D2	7
Nancy Robertson	Female	C1	8
Mike Morris	Male	C2	8
Sarah Mayer	Female	B	9
Jeff Feeney	Male	B	9
Kathy Seaman	Female	A	10

CAMERA PLACEMENT

DISTANCE

In general, the camera should be placed where the judges normally sit to judge the event. However, sometimes it's good to be back a bit further from where the judges sit as this makes it easier for the camera operator to keep the diver in the frame (i.e. your camera operator needs to be better at filming the closer you are to the diver). Also keep in mind though that if the camera operator is too far away the judges will have a hard time seeing a smaller diver in the video when they are judging. You will have to experiment a bit to determine the best vantage point.

3M HEIGHT

For this event, the judges are typically placed 2m – 4m above the pool deck. This may not be possible in all pools and therefore the vantage point will be inconsistent. Given that most of the coaching takes place from the deck level and all pools have a deck, we suggest that the camera be placed on the deck approximately 4m – 5m away from the closest springboard. This distance may not be possible in all pools. In these cases, the on-deck referee will determine the best compromise and may require raising the camera up higher.

Note: For recording the 3m events, the camera should be stationary. You should set the zoom (focal point) to an appropriate setting so that divers do not exit the frame while recording (some divers jump higher than others) and once this is achieved, the camera should be locked into place.

PLATFORM HEIGHT

In normal circumstances, judges are placed 3m – 5m above the pool deck. In doing some testing, we have found that placing the camera higher than approximately 3m does not accurately capture the angle and quality of entry. Keep in mind that for videoing 10m, it is not possible to lock off the camera without being so far back that the athlete becomes too small in the frame for proper judging. The camera operator will need to practice videoing 10m to become proficient at keeping the diver centered in the frame.

REFEREE'S APPROVAL

We appreciate that there are many variables to consider, and that the layout of our pools vary considerably. We have provided the above guidelines, however, the on-deck referee attending your event will have the final say over camera placement.

VIDEO FILE FORMAT

The video files being uploaded to Diving Canada should be in one of the following formats: MP4, AVI, MOV (Quicktime). The videos **MUST** be filmed at a resolution of 1920x1080 (i.e. 1080p). They should also be filmed at 30 fps (frames per second). On some devices this may be listed as 29.97 fps (this is OK). Please ensure you take the time to setup and test your device so that the video clips are in this format. If you don't comply with these specifications it is possible that we cannot use your video and that your divers will not be included in the competition.

VIDEO FILE NAMING PROTOCOLS

You can name the video clips anything you like as long as you send me the name and what boards they are for. A helpful example would be FOREST_CITY_1M_Prelims.MP4.

VIDEO UPLOADING

Please use our shared google drive folder to copy your video clips to (Use the link provided below).

<https://driveuploader.com/upload/DdZ6FU9My/>

Clicking on this link brings up a Google Drive Uploader window. You can simply drag and drop files to this window. You are prompted to enter your name and email address. When the uploader is finished sending the files, both you and Tim Pfeifer get email messages confirming the files have been successfully sent.

If you are having problems with this, please contact Tim Pfeifer (250-888-6283 or timpfeifer@shaw.ca).

VIDEO SUBMISSION DEADLINE

The video files must be completely uploaded to the Drive Uploader folder by **midnight EST on the dates identified for each virtual event.**

Diving Plongeon Canada and Integrated Sports Systems (ISS) will ensure that each video file can be played properly on our broadcast production system. If there are unresolved problems with the video files, there may not be enough time to re-film and upload. So please ensure that you are able to watch the video clips that you created. If we cannot view the video clip that you have uploaded, we may ask you to upload it again to possibly solve the problem. It is encouraged to upload the video clips as soon as they are available and not wait until the deadline. There is much processing involved regarding these video files. Receiving them earlier helps us tremendously.

NOTE: it would be good for you to contact Tim Pfeifer and provide a sample of your video prior to videoing your divers for the event. That way, any complications can be fixed before you video for the competition.

CONTINUOUS VIDEO

When filming an event, the camera operator will start recording before the first diver starts their dive and leaves the camera recording until the last diver finishes their dive (i.e., we are making one large video file for each board or each club participating).

BROADCAST

- Integrated Sports Systems will provide a video stream (broadcast) of the events. Judges will watch the video stream live and provide scores for each dive using ISS u-Judge software, which allows the judges to provide their scores remotely. The scores from the judges go directly into the ISS_MMS scoring software, and are displayed on the video stream, much like

watching a live event.

- An announcer will announce the dives and scores and provide commentary during the event.
- The events will commence at a time to be determined. There will be a short break of 10 minutes between events.
- Communication between the video production team in Montreal, Judges, and Referee will be made using a zoom conference call.
- The judges will see the video stream live without any delay from our broadcast system. The rest of the world will see the video stream with an approx. 20 second delay.
- At the end of each round, we will display standings as per the usual process in a live event.
- At the end of an event, the final standings will be displayed on the live stream.
- The streamed video for each event will be saved so that viewers can watch later.
- Where there is a Finals event, cuts to finals will be made, and a start list will be published.

2. Event Appeal Procedures – Event Jury of Appeals

2.1 The event Jury of Appeals will meet on Monday, June 7th at 8pm ET to address all protests or appeals. Therefore, all the events that have a protest will be considered complete when all decisions have been made by the event referee and the results have been signed off by the event referee on Tuesday, June 8th at noon, ET.

2.2 The Event Jury of Appeals will consist of:

2.2.1 The event referee (chairperson)

2.2.2 All of the respective judging panel for that event

*If a member of the judging panel is not able to attend the meeting on Monday, the judge will be requested to send their comments about the appeal to the meet referee (Sara Toth).

2.2.3 Andrée Pouliot-Deschamps

2.2.4 Sara Toth

2.3 The protest or appeal must be made in writing to the meet referee (Sara Toth) no more than 15 minutes after the conclusion of the event. In the case of C1/C2 or

D1/D2 events, the 15-minute deadline is after the completion of the C2 or D2 event.

2.3.1 When a protest is received during an event (or session), the event referee will not stop the contest. The protest or the appeal will be addressed at the meeting on Monday, June 7th at 8pm ET.

2.4 If the appellant can't be present during the Appeal meeting on Monday, the appellant can send their opinion by email to the meet referee Sara Toth and the event referee.
